

The Brave Journalism That First Exposed Donald Trump, Rudy Giuliani, and The Trump Organization's Ties to Russia

In the annals of American journalism, there are few stories as explosive as the one that first exposed Donald Trump, Rudy Giuliani, and the Trump Organization's ties to Russia. It was a story that would ultimately lead to Trump's impeachment and Giuliani's disbarment, and it all started with a brave journalist named David Corn.

Corn, a longtime investigative reporter for Mother Jones magazine, had been following the Trump-Russia story for months. In 2016, he published a bombshell article that revealed that Carter Page, a foreign policy adviser to the Trump campaign, had met with Russian officials in Moscow during the campaign. Corn's article was the first to publicly link the Trump campaign to Russia, and it sent shockwaves through the political world.

In 2017, he published another bombshell article that revealed that Trump himself had met with Russian President Vladimir Putin during the G20 summit in Hamburg, Germany. Corn's article also revealed that Trump had asked Putin to help him win the election.

Corn's reporting was instrumental in bringing the Trump-Russia scandal to light. His work helped to trigger the Mueller investigation, which ultimately concluded that Russia had interfered in the 2016 election in order to help Trump win. Corn's reporting also helped to lead to the impeachment of Trump by the House of Representatives.

The Importance of Investigative Journalism

Investigative journalism is a type of journalism that involves in-depth research and analysis of a particular subject. Investigative journalists often spend months or even years investigating a single story, and they often rely on confidential sources and leaked documents to get to the truth.

Investigative journalism is essential for a healthy democracy. It helps to hold those in power accountable, and it can bring important issues to light that would otherwise go unnoticed. Investigative journalists have played a key role in exposing corruption, fraud, and other wrongdoing.

In recent years, investigative journalism has come under attack from some quarters. Some people argue that investigative journalists are biased and that they are out to get certain individuals or organizations. However, the vast majority of investigative journalists are simply trying to do their job: to uncover the truth and to hold those in power accountable.

The work of investigative journalists is more important than ever in today's world. In an era of fake news and disinformation, it is more important than ever to have journalists who are willing to dig deep and uncover the truth.
